DEEPENDRA SINGH

Senior Software Engineer
+91 9667309540 | dschinku@gmail.com | Delhi NCR, India | linkedin.com/in/deependra-singh-192b36239 | github.com/er-deepdev

PROFESSIONAL SUMMARY

Senior Software Engineer with over 2 years of experience developing enterprise applications across **supply-chain planning, fintech, Anti-Money Laundering (AML), compliance, and customer-experience platforms**. Experienced in **Java, Spring Boot, microservices**, RESTful APIs, multithreading, and database optimization, with frontend experience in **Angular, AngularJS, React.js, and Ember.js**. Skilled in translating business requirements into technical designs, including high-level (HLD) and low-level (LLD) design, and in high-volume processing and performance optimization. Experienced in coordinating engineering team members, assigning and prioritizing tasks, and tracking deliveries to meet deadlines and release schedules.

PROFESSIONAL EXPERIENCE

SCA Technologies | Senior Software Engineer **Gurugram, Haryana | May 2026 – Present**

- Analyzed business requirements, translated them into technical designs, and developed full-stack **supply-chain planning applications** using Java, Spring Boot, Ember.js, Microsoft SQL Server, and PostgreSQL across backend, frontend, database, and reporting layers, including RESTful APIs and workflows.
- Designed a **historical data migration and archival architecture** that separated current and historical datasets into dedicated structures, improving query performance by **30%** and scalability.
- Optimized complex SQL queries, functions, stored procedures, views, and indexes in Microsoft SQL Server and PostgreSQL; re-engineered database workloads through query tuning and restructuring; managed database upgrades and migrations across environments with **Flyway**.
- Built automated backend jobs for report calculation and generation, with webhook-based notifications for real-time status updates, validation, and report workflow management.
- Optimized **Tableau and Power BI** reporting and database processes, reducing report processing and refresh time by **25%**.
- Used **Redis** for caching and **Apache Spark** for high-volume processing.
- Supported builds and controlled deployments using Git, Jenkins, and CI/CD; performed debugging, root cause analysis (RCA), user acceptance testing (UAT), and performance troubleshooting for production support.

Mente Consultancies | Software Engineer **New Delhi | August 2024 – April 2026**

- Designed and developed scalable enterprise applications using Java, Spring Boot, microservices, Angular, and React.js for **AML**, compliance, AI integration, and customer-experience domains; built RESTful APIs and backend workflows for real-time, batch, delta, and high-volume processing, contributing to architecture, service orchestration, and database schema design.
- Developed AML workflows covering name screening, sanctions screening, Customer Due Diligence (CDD), and Customer Risk Profiling (CRP); integrated **AI/ML-based re-ranking and matching models** into name screening, combining model-driven scoring with rule-based logic to improve match accuracy.
- Designed multithreaded batch and delta processing workflows using Java **ExecutorService** for high-volume screening datasets of approximately 1 to 10 million records in UAT and production, reducing processing time by **30%**.
- Enhanced search and matching performance with **Apache Solr**, cutting matching latency by **35%**; optimized CDD calculation logic using Redis caching and SQL tuning, reducing computation time by **20%**.
- Implemented asynchronous, event-driven workflows using **Apache Kafka and RabbitMQ**; built backend services with Spring MVC, Spring Security, Spring Data JPA, Hibernate ORM, jOOQ, and Node.js/Express.js, integrating PostgreSQL, Microsoft SQL Server, MySQL, and Redis.
- Implemented case management functionality for investigations, including Suspicious Transaction Report (STR) and Suspicious Activity Report (SAR) workflows.
- Integrated external social-media APIs with **intent classification** and AI-assisted processing for customer-experience platforms.
- Coordinated team members, assigning and prioritizing tasks and tracking deliveries to meet deadlines and release schedules.
- Managed deployments and releases on Linux servers (Ubuntu, RHEL) with **Nginx** reverse proxy and load balancing; tuned thread pools to server capacity and workload; supported UAT and production through RCA, log analysis, and debugging.

SKILLS

Languages: Java, JavaScript, TypeScript, SQL, C, C++
Backend & APIs: Spring Boot, Spring Framework, Spring MVC, Spring Security, Spring Data JPA, Hibernate ORM, jOOQ, Node.js, Express.js, RESTful APIs, JSP, Servlets, Thymeleaf
Architecture & Concepts: Microservices, System Design, Distributed Systems, Event-Driven Architecture, Asynchronous Processing, Multithreading & Concurrency
Frontend: Angular, AngularJS, React.js, Ember.js, Redux, NgRx, PrimeNG, Angular Material, Material UI, Tailwind CSS, Bootstrap, HTML, CSS
Databases: PostgreSQL, Microsoft SQL Server, MySQL, MongoDB, Redis (caching/sessions)
Database Engineering: Flyway, Database Design, Database Migration, Indexing, Query Optimization, Performance Tuning
Messaging & Search: Apache Kafka, RabbitMQ, Apache Solr, Full-Text & Fuzzy Search
AI, Data & Reporting: AI/ML Model Integration, AI API Integration, Apache Spark, Tableau, Power BI
Cloud, DevOps & Tools: AWS, Azure, Linux, Ubuntu, RHEL, Maven, Vite, npm, Continuous Integration and Continuous Delivery/Deployment (CI/CD), Jenkins, GitLab CI, Docker, Kubernetes, Git, GitHub, GitLab, Postman, Swagger, Nginx
Soft Skills: Team Leadership, Task Delegation, Requirements Analysis, Problem-Solving, Root Cause Analysis, Communication, Cross-Functional Collaboration, Ownership, Accountability

EDUCATION

Bachelor of Technology in Computer Science and Engineering **July 2019 – July 2023**
Accurate Institute of Management and Technology, Greater Noida
